SECRET	
noted in port many small naval harbor craft armed with	 50X1-HUM
light machine guns, and a small floating dock for motor torpedo boats	
and minelayers.	
noted in the bay four powerful searchlights which take turns	50X1-HUM
during the night at sweeping the coast (see attached Sketch No 2). The	
bay is closely guarded day and night by fast motor boats armed with ma-	
chine guns.	
b - Component commercial port	
On the second pier, counting from the western mole (see attached	
Sketch No 1), in front of the railroad yard noted some huge	50X1-HUM
lumber stacks and about 39 railroad tank cars. At the head of the pier	
is an old tanker, more than 130 meters long, resting on the bottom and	
serving as an extension of the pier. The old tanker is equipped with	
twin 9-inch hoses for loading petroleum. All existing equipment (pumps,	
hoses, and accessories) is left over from World War II, hence old and	
inadequate for fast loading.	
Excavation work is being done along the pier to install 9-inch	50X1-HUM
pipes.	
Pier No 1, counting from the western breakwater (see attached Sketch	1
No 1). Under construction: at present there are two large floating	
cranes working here, one a single-jib and the other a double-jib crane;	
very few workmen observed; the work is going very slowly.	
Pier No 2. Used for loading petroleum, located in front of the	
railroad yard, and obstructed by large lumber stacks as already stated.	
SECRET	50X1-HUM
